

uTypia service – Design Business Card

Product description

Shop-owners can create their own business card by copying a similar product and just adapting the image, text or dimension. The same applies to a business card template

Sometimes or for complex cards the shop-owner may need help from uTypia support with the design of a specific business card – than this service can be purchased.

This service includes the creation of the uTypia product and variant as well as the business card template

For Corporate Identity B2B Business cards the shop-owner (or his printer) must provide the card layout in EPS format (non-changeable parts) in the correct size including bleed as well as a version with text filled in and information about any rules that may apply (e.g. must contain phone no. – dropdown values for Titles or company names)

Color output can be specified also in RGB, CMYK and special colors

Included

Creation of the product + business card template

Not Included

Translation services
