

Product description

uTypia shops are supplied in the official languages of the country of the shop-owner

e.g English for United States, English and French for Canada, German for Germany, German, French and Italian for Switzerland.

This add-on is used if a shopowner wants to add an additional language to his shop (that is not the official language of his country). E.g. add Spanish to a shop in the USA, add English to a shop in Germany.

This option is only available for languages that are supported by uTypia (which is more than 20). For any other language we could provide Excel files in English where you could send the translation of the new needed language to us.

Included Services

Product names and description for all Trodat Products + Categories for the additional language

Translations for all language specific shop terms e.g. (basket, order history, next....)

Translations for payment options

Not Included

Product names and description for non-trodat products + categories (default language will be copied – changeable by shopowner via Excel)

Translation of shipping options

Translation of About us, General terms, any other shopowner-specific content variable texts or text on the 1st page (possible by shopowner)

Translation of any language that is not yet supported by uTypia

The Top-Banner is not language specific
