

Product description

uTypia Engraving Module in connection with a uTypia Shop allows you to sell any type of inscribable product like signs, promotional articles, awards or gifts over the internet. Customers can create the layout of the product online easily, check everything in a layout preview and submit their order to production via e-mail. The output file is production ready!

Features

- Layout preview
- Custom wizard: Text editing, set borders, Graphic upload, exact logo positioning
- Templates
- Output format for engraving (EPS)
- Does not support .eps output for round texts
- Trotec Laser output (optional add on)
- Product image as background in preview
- For optimal design, you can specify margin areas which will be not used for text
- Characters can be compressed only in width, not height, to fit the sign when the optimize function is used
- Outline fonts are supported
- Background images for an optimal preview can be setup

Target group

uTypia Shopowners or those who want to become, and who want to sell laser-engraved and personalized products online

Included Services

- Activation of the Engraving module incl. the possibility for .eps as output format
- Adding of the uTypia demorange of engraving products for editing (for the setup of own engraving products)
- Unlimited number of engraving products can be setup (signs, awards, promotional products, gifts, much more..)
- This service is per customer – so no extra charge for activating if the shopowner has more than 1 uTypia shop

Not Included

- Setup of engraving products
- Setup of templates of the engraving products
