

## Product description

This uTypia service can be used if the Shop owner or an OPD/Reseller wants to create a lot of users in an uTypia shop e.g. bring over existing users from a previous web-shop solution or import users/customers from an ERP/Invoicing tool or create from an user-list

uTypia provides 2 standard formats for User-data import (one with a standard address per user , one with multiple differing billing and shipping addresses). We will send you example files with the data-fields defined.

Please prepare your user-date according to these examples and inform us about any special settings needed.

uTypia support will import the users according to your data.

We can also create random passwords for the users if needed.

## Included

- User import from a list – list must be prepared according to the uTypia standard formats. There are 2 templates for that – 1 for single addresses, 1 for different billing- and shipping addresses.
- One redo of the user-import if a parameter got missed

## Not Included

- Preparation of the user-list
- Update of existing users

## Prices/conditions

### **One-time fee – per import**

#### **available for the following uTypia products:**
